COLLETT

EXPERTS IN MOTION

One of Three; Our New MAN 6x4 Heavy Duty Truck

New fleet news! The first of a trilogy, Collett's new MAN TGX 26.580 6x4 is the first of three additions to their heavy duty haulage fleet.

This new MAN TGX 26.580 6x4 is the first of three additions to Collett's heavy transport fleet, with two more scheduled to arrive in the coming weeks. The vehicle meets all Euro-6 emission standards and is ready to operate within all Ultra Low Emission Zones* (ULEZs) in London which came into effect on 8th April 2019.

This MAN tractor unit has a Special Type General Order (STGO) Category 3 plate giving the vehicle a gross vehicle weight of 150 Tonne. This combined with the 580 HP engine makes the vehicle ideal for undertaking heavy operations.

With the addition of our new 6x4 tractor unit, their specialist fleet of trailers, SPMTs and heavy haulage tractor units allows Collett Transport to provide bespoke heavy haulage logistics and heavy lift services for abnormal loads and oversized cargo.

*The ULEZs scheme aims to reduce air pollution by 80% and will be implemented into other cities within the UK in the near future.

- ENDS -
